

IMMERSIVE *ENVIRONMENTS* SENIOR PROJECT

"The Forest"

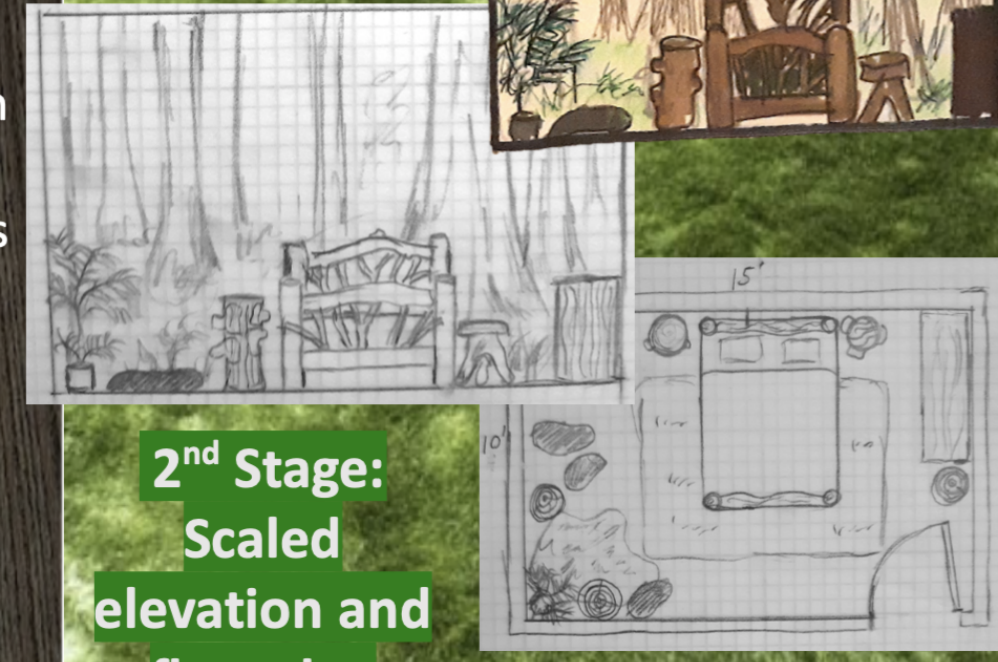

By Erin Pait

An "immersive *environment*" is where an individual feels as if they are in a particular location through the use of visual and tangible design. I am designing bedrooms with this concept in mind. This interior environment is uniquely achieved through carefully chosen murals of the correct perspective, which give the visual illusion of depth. All the furnishings and décor will match the theme of the room to help create the immersive atmosphere. I am designing three bedrooms, one is shown here:

1st Stage of Design: Concept Sketches

2nd Stage: Scaled elevation and floorplan

3rd Stage: Colorized Renderings
