# "Mellow Yellow"

I am creating a multi-functional space for artists, designers, performers, and crafters of all passions. I will use color theory as a guide to select colors and patterns. I have chosen Yellow, Green, and Orange hues as the primary colors of the space. I will use accent colors of Blue and Purple. The walls will be painted with a very low chroma Yellow/Green to introduce happiness as soon as customers walk through the entrance. There will be Evergreen tile floors to encourage new friendships and partnerships. The cooler hues that I have chosen as secondary colors for this environment will bring a sense of calmness and a "want to create." The space's main goal will be to enhance the artistic process.

## MELLOW YELLOW
